BOSIAK

FRONTEND DEVELOPER

CONTACT

 szymon.bosiak.99@gmail.com +48 690 193 597 github.com/szymon-bosiak linkedin.com/in/szymon-bosiak

SKILLS

Core

React 17-19, TypeScript, JavaScript (ES6+), HTML5, CSS/SCSS, Tailwind, Vue 3

UI

MUI v7 / MUI X, Storybook, design systems, Framer Motion

Data & state

TanStack Query/Router/Table, Zustand, react-hook-form, Zod, REST, GraphQL (basics)

Testing

Vitest, react-testing-library (Jest API)

Tooling

Git/GitHub, Next.js, Vite, i18next, Contentful, ESLint, Prettier, Husky, Docker (basics)

EDUCATION

University of Wrocław

Master of Laws

Programming

self-taught – fully professional since 2024

LANGUAGES

Polish – native

English – C1 (TOEFL certificate)

Frontend developer with 2+ years of commercial experience, since late 2024 at the Codetain software house, where I am the lead frontend contributor on two products – a B2B e-mobility application and the new company website. I work daily with React + TypeScript and MUI/MUI X, write unit tests (react-testing-library) and build components in Storybook. I value readable code, deliberate architecture and working close to the product.

EXPERIENCE

NOV 2024 – PRESENT

FRONTEND DEVELOPER – CODETAIN

B2B platform for EV fleet charging management (international e-mobility client)

- Lead frontend contributor (1,200+ commits, ~60% of repository history), working alongside another frontend developer and the client's team.
- Stack: React 19, TypeScript, MUI 7 + MUI X, TanStack Router/Query/Table, react-hook-form + Zod, Vite.
- Complex, performant views: fleet and charge-point operator dashboards, maps (Mapbox), multi-step session booking, availability schedules, i18n.
- Unit tests for utilities, hooks and components – Vitest + react-testing-library (Jest-compatible API).
- Code review, documented team conventions, Git flow.

New Codetain company website

- Main developer of the project (2,200+ commits, ~90% of repository history) – Next.js 15, React 19, TypeScript, Storybook 9 (a11y addon), Tailwind 4, Contentful (headless CMS).
- Reusable component library documented in Storybook; validated forms (react-hook-form + Zod); ESLint / Prettier / Husky.

APR 2024 – NOV 2024

FRONTEND DEVELOPER – FREELANCE

- Websites and web apps for clients, incl. a timber construction company website, an invoicing app and a weather app – Vue 3, JavaScript, Tailwind, SCSS, Vite.
- Owned the whole client relationship: requirements, estimates, delivery.

SIDE PROJECTS

- **queistal-v2** – solo rewrite of a company website in React 19 + TypeScript, TanStack Start, Cloudflare Workers.
- **queistal-search-tool**, **how2ow** and more.
